

IP18 Minisphere

The smaller sibling to the Exosphere, the 2 sided play panel is at a low height for access for young children and wheelchair users. The games are both very different, one with a high visual appeal which is great for children with limited mobility and coordination, whereas the airlock game increases children's awareness of function and movement.

Activities	Tumble ball and airlock games, puzzles, sound, social, visual movement
Features	Double sided play panel HDPE graffiti resistant Puzzle and sound
Age range	2+ years
No of users	2
Falling space	This unit has a usage area of 3.6m ²
