

Simple looking Troll trapeze provides more challenge than meets the eye at first. The ropes are "living" and responsive to every movement. Balancing on the equipment is fun – whether played alone or with friends. This product can be used in many ways. Without specific entry or exit points it is good also for social interaction and communication, as well as for hanging out with friends. The Troll trapeze consists of two tall vertical posts, supported by one diagonal post each. The vertical posts are connected on the top with a horizontal beam, a rope on the bottom and two diagonal ropes from the top beam to the bottom rope. There are also six branches on the posts, one on each vertical and two on each diagonal posts.
